TO WHOM IT MAY CONCERN

This is to advise that I have had the distinct pleasure of working with BSW (Berleburger Schaumstoffwerk GmbH, Bad Berleburg/Germany) over the period December 2009 to May 2010 and again from December 2010 to March 2011 for the installation of the IAAF certified UWI/Usain Bolt Running Track at the University of the West Indies (UWI) and the track at our National Stadium, respectively.

My first encounter with the company has demonstrated to me the level of professionalism, competency and due diligence they apply to the tasks at hand. From the outset they partnered with the University and the Government of Jamaica of ensuring value and quality of the product.

As Manager for the Campus Projects Office who has responsibility for the infrastructure initiatives at the UWI, Mona campus, I was particularly impressed with the detail of their engineering, their supervision and the efficient manner in which they followed-up on activities; the company exhibited a team approach that is worthy of commendation. Of note also, is the comment made by the IAAF certified marker who benchmarked the quality of the finished product for both stadia to that of the Berlin Olympic Stadium, which accommodated the 2006 FIFA World Championship as well as the 2009 IAAF World Championship. Overall, my impression of the BSW based on my experience, is that it is committed to satisfying its stakeholders and to deliver quality service.

Having observed these qualities, I unreservedly recommend BSW as exceptionally competent to undertake any initiative within its scope of operation. Please feel free to contact the undersigned for further information you may require regarding the subject.

Yours sincerely,

.....
Devon R. Smith

Manager
